FILTRYX

YOUR SOLUTION FOR RELIABLE, VALIDATED AND EFFICIENT XML HANDLING

- Triage based on the customization of your own marketing authorizations and status of your products in all concerned EU countries. While simultaneously providing full documentation of your search itself and the triage results.

FILTRYX
FOCUS, FINISH OR FORGET

*FILTR*Y*X*

- Processing an entire batch of downloaded XML files in one single step within seconds

- Displaying the worldwide unique case identification number together with the EV Human number identifying the XML

FILTR**Y**X
FOCUS, FINISH OR FORGET

FILTRYX

- Automated assessment of case ownership based on the customized marketing authorizations and marketing status of your products

- Displaying all ICSRs for which case ownership cannot be excluded and requires to be processed in the MAH's safety database regarding the suspected product substances

- Displaying the applicable exclusion criterion for all ICSRs and products

- Enables access to the RTF view for each XML file for assessment of more details, if required

- Allows adjustment of the automated assessment for specific reasons

FILTRYX
FOCUS, FINISH OR FORGET

*FILTR*Y*X*

- Serves as documentation which can be exported either as PDF document and/or in CSV format for being archived according to the business policies

- Allows for direct import of the XML files selected for further processing into your safety database application
